

Notes about this year's disc selections:

Gateway Diamond Journey:

The Journey is Gateway's newest long range driver. It has a low profile and long wing for speed and a perfect transition from the nose to the flight plate, allowing it to have a long, straight, controllable flight with just the right amount of overstability. It has enough resistance to turn for the big arms, but it's not too overstable for the smaller arms and newer players. Players of all skill levels should be able to make the Gateway Journey one of the longest throwing discs in their bag.

How most discs are hotstamped

Innova Luster Champion Teebird3

This disc was produced especially for Ice Bowl 2018. It's an overstable fairway driver with an attractive Luster plastic. Compared to the Teebird, the Teebird3 is faster with less glide, but has the same turn and flight ratings. Many people have described a lot of discs as a "faster Teebird", but this is the real deal. The flatter flight plate promotes speed while reducing glide, effectively producing consistent, accurate flights. This is a point and shoot, target specific fairway driver. It is a great choice for accurate shot-shaping and a 'Go-To' fairway driver. A faster Teebird with less glide.

Millennium Standard Scorpius

This is the first release of the Scorpius in Standard (Pro) plastic. The Scorpius is a high speed, ultra-long range fade overstable driver. It is a step below the Quasar in terms of speed and fade, but will provide excellent distance and control for into-the-wind conditions. It is recommended for moderate-powerful throwers who need something that with dependable fade and sustained glide.

The **Nested Mini Set** has one smaller mini, the **Spyral** (image on the right) nesting into the larger mini, the **Little Flyer** (on left), which makes a small container for keeping smaller items like loose change.
